Administer the appropriate combination of tablets

**MODE OF ACTION**

SIMPARICA TRIO contains three active pharmaceutical ingredients, sarolaner, moxidectin and pyrantel, which are formulated to provide minimum dosages of 0.54 mg/lb (1.2 mg/kg) sarolaner, 0.011 mg/g (24 mg/kg) moxidectin, and 2.27 mg/g (54 mg/kg) pyrantel (as pamoxinate salt).

Sarolaner is a member of the isoxazoline class of parasiticides which is a fermentation product of Streptomyces cyanogriseus subsp. noncyanogriseus. Sarolaner is a peroxisomal proliferator-activated receptor gamma (PPAR γ) agonist. It is a member of the isoxazoline class of parasiticides and the chemical name is (E)-1,4,5,6-Tetrahydro-1-methyl-2-[2-(2-thienyl) vinyl] pyrimidine. Each tablet is formulated to provide minimum dosages of 0.54 mg/lb (1.2 mg/kg) sarolaner, 0.011 mg/g (24 mg/kg) moxidectin, and 2.27 mg/g (54 mg/kg) pyrantel (as pamoxinate salt).
